

CLAIMS

What is claimed is:

1 **1.** A double-anchor strapless dildo comprising:
2 an insertion shaft (1) extended intermediate an attachment base (2) and an
3 insertion end (3);
4 the attachment base (2) having an anal anchor (4) and a vaginal anchor (5);
5 the anal anchor (4) being extended predeterminedly from an attachment side
6 of the attachment base (2); and
7 the vaginal anchor (5) being extended predeterminedly from the attachment
8 side of the attachment base (2) intermediate the anal anchor (4) and the insertion
9 shaft (1).

1 **2.** The double-anchor strapless dildo of claim 1 wherein:
2 the anal anchor (4) is articulated for ease of insertion into and for deterring
3 escape from an anus.

1 **3.** The double-anchor strapless dildo of claim 1 wherein:
2 the vaginal anchor (5) is articulated for ease of insertion into and for deterring
3 escape from a vagina.

1 **4.** The double-anchor strapless dildo of claim 3 wherein:

2 the anal anchor (4) is articulated for ease of insertion into and for deterring
3 escape from an anus.

1 5. The double-anchor strapless dildo of claim 1 wherein:

2 the anal anchor (4) includes a circular point (6) having a circular base (7) that
3 is extended radially outward from an anal-anchor protrusion (8) that is extended
4 from the attachment side of the attachment base (2);

5 the circular point (6) is blunted and elongated predeterminedly for ease of
6 entry into and gentle spread of an anal orifice;

7 the circular base (7) includes a rounded edge that is articulated for hooking
8 bluntly onto an inside of an entry wall of the anal orifice; and

9 the anal-anchor protrusion (8) includes a length that is proximate a thickness
10 of the entry wall of the anal orifice.

1 6. The double-anchor strapless dildo of claim 1 wherein:

2 the vaginal anchor (5) includes a vaginal-anchor shaft (9) having a length and
3 shape for insertion predeterminedly into the vagina.

1 7. The double-anchor strapless dildo of claim 6 wherein:

2 the vaginal-anchor shaft (9) includes a predetermined vaginal-anchor head
3 (10) proximate a terminal end.

1 **8.** The double-anchor strapless dildo of claim **6** wherein:
2 the vaginal anchor **(5)** includes a predetermined vaginal-anchor hook **(11)**
3 proximate a base end of the vaginal-anchor shaft **(9)**; and
4 the vaginal-anchor hook **(11)** is positioned and articulated for engaging
5 forward walls of the vagina that are supported by bony structure of the symphysis
6 pubis.

1 **9.** The double-anchor strapless dildo of claim **1** wherein:
2 the vaginal-anchor shaft **(9)** includes a predetermined vaginal-anchor hook
3 **(11)** proximate a base end of the vaginal-anchor shaft **(9)**; and
4 the vaginal-anchor hook **(11)** is positioned and articulated for engaging
5 forward walls of the vagina that are supported by bony structure of the symphysis
6 pubis.

1 **11.** The double-anchor strapless dildo of claim **1** wherein:
2 the insertion end **(3)** of the insertion shaft **(1)** includes a predetermined
3 insertion-shaft head **(12)**.

1 **12.** The double-anchor strapless dildo of claim **8** wherein:
2 the insertion end **(3)** of the insertion shaft **(1)** includes a predetermined
3 insertion-shaft head **(12)**.

1 **13.** The double-anchor strapless dildo of claim 8 wherein:
2 the insertion shaft (1) is articulated for deterring lateral pivot by dual
3 anchoring with the anal anchor (4) and the vaginal anchor (5).

1 **14.** The double-anchor strapless dildo of claim 8 wherein:
2 the attachment base (2) is articulated for deterring unwantedly loose linear
3 travel of the insertion shaft (1) by spread-dual anchoring with the anal anchor (4)
4 being buttressed by aft bony structure of the anus for deterring rearward linear travel
5 and the vaginal-anchor hook (11) being buttressed by the bony structure of the
6 symphysis pubis for preventing forward linear travel.

1 **15.** The double-anchor strapless dildo of claim 8 wherein:
2 the attachment base (2) is articulated for deterring unwantedly loose vertical
3 travel of the insertion shaft (1) by the spread-dual anchoring with the anal-anchor
4 (4) being buttressed by the aft bony structure of the anus for deterring vertical travel
5 and the vaginal-anchor hook (11) being buttressed by the bony structure of the
6 symphysis pubis for preventing unwanted vertical travel of the insertion shaft (1),
7 verticality of the vertical travel being proximately common to an axis of the vagina.

1 **16.** A double-anchor strapless dildo comprising:
2 an insertion shaft (1) that is articulated for being maintained in a desired
3 position proximate a vagina of a female body by an anal anchor (4) in combination

4 with a vaginal anchor (5) which are juxtaposed laterally from proximate a base end
5 (13) of the insertion shaft (1).

1 17. The double-anchor strapless dildo of claim 16 wherein:
2 the insertion shaft (1) is articulated for deterring unwantedly loose vertical,
3 linear and pivotal travel by spread-dual anchoring with the vaginal-anchor hook (11)
4 being buttressed by the aft bony structure of the anus for deterring vertical travel and
5 the vaginal-anchor hook (11) being buttressed by the bony structure of the
6 symphysis pubis for preventing unwanted vertical travel of the insertion shaft (1),
7 verticality of the vertical travel being proximately common to an axis of the vagina
8 and the linear travel and the pivotal travel being proximate orthogonal to the axis of
9 the vagina.

1 18. A double-anchor strapless dildo comprising:
2 an insertion shaft (1) that is articulated for being maintained in a desired
3 position proximate a vagina of a female body by an anal anchor (4) in combination
4 with a vaginal anchor (5) which are juxtaposed laterally from proximate a base end
5 (13) of the insertion shaft (1);
6 the insertion shaft (1) being articulated for deterring unwantedly loose
7 vertical, linear and pivotal travel by spread-dual anchoring with the vaginal-anchor
8 hook (11) being buttressed by the aft bony structure of the anus for deterring vertical
9 travel and the vaginal-anchor hook (11) being buttressed by the bony structure of

10 the symphysis pubis for preventing unwanted vertical travel of the insertion shaft
11 (1), verticality of the vertical travel being proximately common to an axis of the
12 vagina and the linear travel and the pivotal travel being proximate orthogonal to the
13 axis of the vagina;

14 the anal anchor (4) being articulated for ease of insertion into and for
15 deterring escape from an anus;

16 the vaginal anchor (5) being articulated for ease of insertion into and for
17 deterring escape from a vagina;

18 the anal anchor (4) including a circular point (6) having a circular base (7)
19 that is extended radially outward from an anal-anchor protrusion (8) that is extended
20 from the attachment side of the attachment base (2);

21 the circular point (6) being blunted and elongated predeterminedly for ease
22 of entry into and spread of an anal orifice;

23 the circular base (7) including a rounded edge that is articulated for hooking
24 bluntly onto an inside of an entry wall of the anal orifice;

25 the anal-anchor protrusion (8) including a length that is proximate a thickness
26 of the entry wall of the anal orifice.;

27 the vaginal anchor (5) including a vaginal-anchor shaft (9) having a length
28 and shape for insertion predeterminedly into the vagina;

29 the vaginal-anchor shaft (9) including a predetermined vaginal-anchor head
30 (10) proximate a terminal end (14);

31 the vaginal-anchor shaft (9) including a predetermined vaginal-anchor hook

32 (11) proximate a base end of the vaginal-anchor shaft (9);
33 the vaginal-anchor hook (14) being positioned and articulated for engaging
34 forward walls of the vagina that are supported by bony structure of the symphysis
35 pubis; and
36 the insertion end (3) of the insertion shaft (1) including a predetermined
37 insertion-shaft head (12).

1 19. The double-anchor strapless dildo of claim 1 wherein:
2 the double-anchor strapless dildo is made of dishwasher-safe material having
3 a predeterminedly smooth exterior surface.

1 20. The double-anchor strapless dildo of claim 16 wherein:
2 the double-anchor strapless dildo is made of dishwasher-safe material having
3 a predeterminedly smooth exterior surface.
